## // THE INTERNATIONAL LEADING EVENT FOR SAILING AND MOTOR MULTIHULLS

L'International Multihull Show returns to the port of La Grande Motte from 23 to 27 April for a landmark edition. The must-attend event for multihull enthusiasts and professionals will showcase more than 70 boats and feature key players in the business: builders, equipment manufacturers, charter companies and designers. In 2025: for the first time, the show will feature two marinas. The Quai des Douanes will host an area dedicated to power multihulls, with around fifteen boats and the opportunity to test some at sea.

The usual in-water area will be entirely devoted to sailing multihulls, with more than 60 boats representing the best-known brands: Lagoon, Fountaine Pajot, Nautitech, Bali, Catana, Excess, Outremer, Windelo and many others, as well as international shipyards such as Seawind, Leopard, Vaan Yachts, Dragonfly and Knysna.

Several international shipyards will also be exhibiting ashore, including INKOMET GROUP SP. Z O.O, ALÀBRIGA CATAMARANS, OMAVA YACHTS, MULTICAT ALGARVE, VISION YACHTS, McConaghy Multihulls, ARCHIPELAGO EXPEDITION YACHTS and ADVANCED ITALIAN YACHTS SRL

The charter companies Dream Yacht Charter, Signature Sailing, Apaca/Corse Catamaran and Navigare will also take part to showcase their charter management services. The show will feature world premieres of ten new models, including the Tortue 147, Lagoon 38, Excess 13, Tricat 8.50 and Modx 70, as well as several European and French exclusive models. Equipment manufacturers and designers will be presenting their latest innovations in the exhibitors' village, which has been redesigned to emphasise innovation and sustainable design. The show is therefore consolidating its position as the benchmark event in the multihull world, reinforcing its appeal to enthusiasts and professionals alike.

Bon salon everyone!

**Jean-Paul Chapeleau,**  
President of the Fédération des Industries Nautiques

# A NEW LAYOUT FOR 2025

(MORE POWERCATS AND A CLOSE CONNECTION TO THE TOWN OF LA GRANDE MOTTE)

## La Grande Motte, the world capital of multihulls

Once again this year, La Grande Motte will be taking centre stage in the world of yachting for the International Multihull Show. This unique event brings together enthusiasts and professionals from the industry, offering a unique insight into the fascinating world of catamarans and trimarans.

Much more than a mere trade fair, this event is a celebration of innovation and boating know-how. It is an opportunity to admire the latest technological developments, meet the major players in the marine industry and draw inspiration from the trends that will shape the future of yachting. This edition is marked by a record number of vessels on display, world exclusives and, for the first time, a marina dedicated to powercats. It is also a special opportunity to reinforce our commitment to being at the cutting edge of the blue economy and the positive impact of coastal development.

Our thanks to all those who, through their involvement, make this show a huge success year after year. I would particularly like to acknowledge the work of the French Nautical Industries Federation, whose expertise and passion have already contributed to the 2024 edition.

Whether you are an experienced sailor, a lover of beautiful lines or simply curious to discover this fascinating world, the International Multihull Show is ready to welcome you. Take advantage of this opportunity to explore, exchange ideas and dream!

I wish you all a memorable event and a most enjoyable stay in our beautiful City of Pyramids. Welcome to La Grande Motte, the undisputed capital of multihulls!

**Stéphan Rossignol**, Mayor of La Grande Motte

# THE MULTIHULL EXPERIENCE: SAIL AND POWER

Le Salon International du Multicoque repris par la Fédération des Industries Nautiques via sa filiale événementiel M2Organisation en septembre 2023, continue son expansion et innove avec entre autre une marina dédiée aux multicoques à moteur et des espaces repensés à terre. Le Salon confirme année après année son statut d'évènement incontournable. Fort de son succès, le Salon poursuit sa croissance aussi bien à flot qu'à terre avec une édition qui s'annonce historique, renforçant sa position de vitrine mondiale de l'univers multicoque.

Cette édition marque un tournant avec ses deux marinas dont une dédiée au moteur, une première dans l'histoire du Salon qui témoigne de l'évolution du marché et l'intérêt croissant pour ce segment. La diversité des modèles et équipements présentés font du Salon un véritable carrefour d'innovations et d'échanges. Il vous accueille chaque année dans une ambiance conviviale et résolument tournée vers la passion de la navigation.

L'édition 2025 se distingue également par une forte présence étrangère. Un indicateur sur l'attractivité et les opportunités qu'offre l'International Multihull Show.

C'est un véritable regain d'intérêt avec notamment :

# MULTIHULL DESIGN & INNOVATION

## The Multihull Design & Innovation is:

- An open space at the heart of the village, an absolute must-see at the Show
- A key exhibition venue designed entirely to showcase cutting-edge projects and innovations
- A shared space bringing together **all the big names in architecture and design in the multihull industry**, start-ups, equipment manufacturers with new and future products, and much more

Le Multihull Design & Innovation is the must-see venue for visitors and exhibitors.

# THE OCCITANIE REGION, DRIVING MARINE INNOVATION AT THE 2025 INTERNATIONAL MULTIHULL BOAT SHOW

## La Grande Motte, from 23 to 27 April 2025

A true global meeting place for boating enthusiasts and professionals, the International Multihull Show returns for a very promising 16<sup>th</sup> edition. Keeping up with its commitment for over 12 years, the **Occitanie Region**, a long-standing partner of the event, will once again be present to fly the flag for a region that is a leader in the blue economy.

## A strategic sector, propelled by regional excellence

The Occitanie is an innovative and creative region, supported by a dense industrial network and a comprehensive value chain that are the strength of its boating industry. With over 1,200 companies and nearly 2,000 employees, the region is home to iconic shipyards such as Outremer, **Catana, Gunboat and Windelo**, which are renowned worldwide for their high-quality craftsmanship and innovation.

Alongside them, a multitude of equipment manufacturers, designers, charter companies and innovative small and medium-sized enterprises contribute to promoting **internationally recognised local expertise**.

## A common goal for the future of leisure boating

The 2025 show also marks the **first anniversary of the regional 'Nautical Industries and Services' cluster agreement**. Signed in partnership with the French government and the French Nautical Industries Federation, this agreement reflects a shared desire to structure and strengthen the sector, with a focus on innovation, job creation and skills development, for a more sustainable leisure boating industry.

Establishments such as the **Nauticampus in Canet-en-Roussillon** and the **Institut Nautique Méditerranéen** in Grau-du-Roi offer specialist courses to train the talented individuals of tomorrow and meet the sector's skills needs.

## An industry that redefines the boundaries of innovation

From design to propulsion, companies in Occitanie are constantly reinventing marine leisure. In tune with market demands and environmental challenges, they provide innovative solutions: bio-based materials, hybrid or electric engines, smart systems, etc. This pioneering spirit is shared by many regional players, making Occitanie one of Europe's most innovative regions in this market.

Deeply committed to **preserving its resources**, the region's marine industry is committed to **sustainability**, respect for the environment and upskilling professionals. Projects led by local companies and laboratories aim to reduce the impact of materials used in boat building, developing biomaterials such as **BIOBAT** or solutions for recycling composites from end-of-life boats, a major challenge for the industry, created by **THANA'BOAT**.

## An invite to live by the sea in Occitanie

With its **220 kilometres of Mediterranean coastline**, modern marinas and pleasant climate, Occitanie is the ideal destination for sea lovers. The region offers a wide range of water sports in a rich, unspoilt and picturesque environment. Every year, this cultural and natural heritage attracts large numbers of tourists and enthusiasts, contributing to the local economy and the region's international reputation. Our ambition is to make the **Mediterranean coast of Occitanie** a centre of maritime excellence, combining **recreational boating, marine tourism, sustainable development and innovation**.
